BIOBASED

MANUFACTURING THE WORLD'S SAFEST AND MOST FLEXIBLE FRAME!

We take great pride in boasting about all the safety features in our frames. FlexFrames offers 17 sizes, 26 models, and 21 combined colors of our Flexible and Safe frames; ensuring the largest selection from which your patients may choose. Below are important facts that you should know about our products:

- Proposition 65 Compliant
- Can hold a +/- 28 prescription
- BPA Free
- Phthalate Free
- Rubber Free
- Latex Free
- Metal Free
- Holds Prisms
- We cover EVERY age group
- COMING SOON! Ability to customize temple arm length to child's EXACT measurement.

There is no such thing as extravagant spending when it comes to your child's safety.

At Flex Frames, our Flexible and Safe Collection has no metal parts, and in fact they are so soft that both children and adults can sleep while wearing them without causing injury to themselves or damaging the frame.

People with strong prescriptions love to be able to see as soon as they wake up, without the worry of searching for their glasses to be able to see.

Our anatomically designed bridge eliminates the need for nose pads and the inherent risks associated with them. The soft cloth elastic band behind the wearer's head between the ears assures that the frame stays on. We have designed the tensors so that they will take up any slack, with no leftover elastic to cut or unravel.
